Product solutions

pharmaceutical sourcing, medical product development, and manufacturing

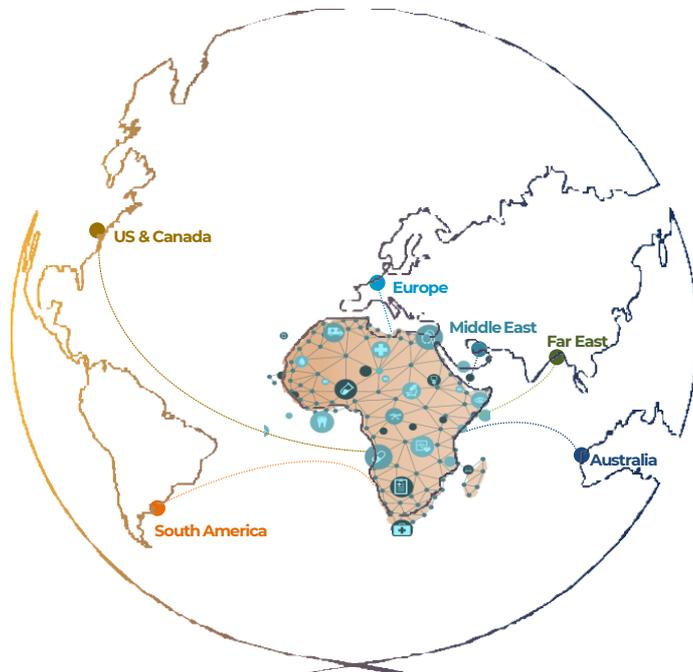

RELIABLE CLINICAL LOGISTICS & SUPPLY CHAIN MANAGEMENT

We are a leader in clinical supply chain management solutions providing distribution and fulfilment services to clients and partners in 30 territories across Africa .

We understand that today's increasingly stringent healthcare regulations, growing outsourcing, and globalisation of production demand greater flexibility from healthcare supply chains so as to optimise costs.

One of the major benefits of working with us is that you gain access to your own dedicated project management team. Our team consists of project managers, clinical logistics coordinators and assistants. Our task is to manage your project at a both local and international level and provide our clients and partners with all the necessary communication on representation, global supply, investigational sites and relevant regulatory requirements.. Our services to our clients and partners entail:

- **Global sourcing**, we source medications, as well as the ancillary medical supplies required for clients and partners. Through our global network e have direct contracts with leading manufacturers and can ensure the availability of products, even in the event of shortages or stoppages in a distribution process.
- **Storage and inventory management**, done through our warehouses in multiple countries across the continent enables us to meet stringent international standards and local regulatory requirements. We provide our clients and partners with a full suite of storage services which includes safe custody of their products from receipt; recording and provision of ambient-controlled and cold chain goods storage; labelling/relabelling of medications; formation and distribution of supplies to investigational sites while maintaining the cold chain return, recording and storage of supplies for export.
- **D-MED services**, provides for the treatment of patients with chronic or unmet medical needs which often demands access to medicines that have not yet been approved or are not available in the patient's home country. We are an experienced supplier of innovative medicines for chronic conditions and rare diseases upon requests from physicians or on behalf of individuals. We successfully manage the full cycle of logistics, from import license submission to customs clearance and distribution to patients.

- **Medical equipment leasing services**, we provide our clients and patients with a number of affordable options to access modern equipment and devices by making partial payments while avoiding the added cost of technical maintenance. Our partnerships with some of the leading international manufacturers enables the accessing of highly specialised equipment/devices from across the world.

Smarter logistics with D-MED®

Rely on our experienced team

Trust the experts on our knowledgeable, responsive and vigilant Shipping Strategy team to take care of you while they protect, monitor and manage your shipment program. Think of us as your own logistics dream team.

Tap into advanced analytics and insights

Stay informed with daily reports, analytics and insights to give you the knowledge you need to feel confident that your shipping is under control.

Free up your time

Save valuable time explaining your unique needs to individual delivery services — or waiting on the phone to do so. Our Shipping Strategy team, and your dedicated point of contact, will communicate with carriers on your behalf so you don't have to wait on hold. We will also manage the ongoing relationship with these carriers to ensure your best interests are top of mind.

Let us solve logistics challenges

Take the worry of coordinating shipping adjustments off your to-do list. We can manage and provide visibility to lost and delayed packages and intervene as necessary to ensure successful and timely delivery of shipments.

Access a full portfolio of services

In addition to managing your small parcel and large freight shipments, D-MED® Logistics has enhanced services and capabilities to meet all of your logistics needs, including same-day courier solutions, regional parcel carrier relationships, mail consolidation capabilities, a shipment protection offering, pharmacy system integration and a multi-carrier shipping hub.

Get customized management of your shipping modes

Starting with a business assessment, let us advise on your shipping practices and help you choose the right modes based on the needs of your business and each type of package. We will help you implement industry best practices to make sure you operate at maximum capacity.

Enjoy lower shipping prices

The significant buying power of ABX Health and our relationships with international carriers means we can negotiate the best total value for you.

Join an industry leader

D-MED® Logistics from ABX Health is a leading expert in healthcare logistics management. Each year we manage more than 20 million shipments for more than 600 locations across the healthcare continuum, generating collective savings of more than US\$60 million for our customers.

Clinical Logistics. Handled.
